Dr. rer. nat. Sandra Greiner
Associate Professor

November 26, 2025

Contents

1 Introduction **1**

2 Background and State-Of-The-Art **4**
2.1 Variable Software Development 4
2.1.1 Principles of Software Product Lines 4
2.1.2 Classification of Edits to Configurable Software 4
2.2 Principles of Natural Language Processing 4
2.2.1 Basics 4
2.2.2 Topic Modeling 4

3 Implementation **5**
3.1 Preliminaries 5
3.1.1 DiffDetective 5
3.2 Architecture 5
3.3 Evaluation 5
3.3.1 Setup 5
3.3.2 Results 5
3.3.3 Threats to Validity 5

4 Discussion **6**

5 Conclusion **7**

Chapter 1 Introduction

trying a reference: We contribute a Rust adapter for the tool ECCO [3, 2].

trying with novel page

and another one

Chapter 2 Background and State-Of-The-Art

2.1 Variable Software Development

2.1.1 Principles of Software Product Lines

2.1.2 Classification of Edits to Configurable Software

Edits to variable software can fully classified in 8 categories [1].

2.2 Principles of Natural Language Processing

2.2.1 Basics

2.2.2 Topic Modeling

Chapter 3 Implementation

3.1 Preliminaries

3.1.1 DiffDetective

3.2 Architecture

3.3 Evaluation

3.3.1 Setup

3.3.2 Results

3.3.3 Threats to Validity

[4]

Chapter 4 Discussion

]

Chapter 5 Conclusion
